SIS Software Uninstall Instructions
Cookbook

Multibeam Advisory Committee
March 21, 2012
SIS 3.8.3
NOTE: These are directions for uninstalling the SIS software. This is necessary to replace a corrupted SIS database. Prior to uninstalling SIS please read the “SIS Configuration Backup” cookbook.
Make sure that SIS and the DataDistribution.exe are quit. Using the mouse Select “Start -> SIS -> Uninstall”.

Multibeam Advisory Committee – March 21, 2012
Click “OK” when the above dialog box appears. Besides not uninstalling or deleting any of the items listed above, it will also not delete any user created files in the SIS Data directories.
SIS Software Uninstall

Click “Yes”.

Multibeam Advisory Committee – March 21, 2012
This message is reminding you that you should have saved your user settings (and PU settings) before going down this road. If you haven’t done this, read the “SIS Configuration Backup” cookbook before continuing with the uninstall.

Multibeam Advisory Committee – March 21, 2012
This step allows you to delete the contents of the SIS database. If you are doing this to reset a corrupted SIS database make sure you click “Yes”.

Multibeam Advisory Committee – March 21, 2012
Wait until SIS finishes its uninstall and then click “Close”.

Multibeam Advisory Committee – March 21, 2012
Restart your computer and you are ready to start a fresh install of SIS. Read the “SIS Software Install” cookbook if you have any questions on the install process.
